3.) Influence policy changes at the local, state, and national Jevels

productive
and satisfying
life and are
active
members of
their
community.

Individuals

living with

SMI lead a

IMPACT

Inequalities in care for people living with SMI are directly linked to poor physical, mental, and social health outcomes.

Several,
systemic
factors
contribute to
these
disparities
including siloed
approaches to
care and
pervasive
stigmas.

A central community where an integrative model for care is affordable, accessible, and individuals living with SMI can receive physical and mental health treatment, access nutritious food and meals, build supportive relationships, and live fulfilling and meaningful

5.) Mobile Clinic

(Wellness on Wheels)

6.) Tiny Homes Village

7.) Healthy Food Initiatives

8.) Leadership and expertise to implement the programs

9.) IPS supported employment

Partner Activities
